

Solutions Guide

2020 EDITION

The Vista philosophy

WHO ARE VISTA?

Vista is a UK based, trusted manufacturer of Video Surveillance products. We have made it our mission to understand our customers' needs. Our CCTV security solutions offer innovative products, using the most powerful and stable technologies - wrapped up in a support environment to ensure your projects run smoothly.

We pride ourselves on creating a range of differentiated solutions, developed in alignment with customer feedback to help you to deliver in the ever-changing marketplace.

Vista don't just provide Video Surveillance products or send you a datasheet, we listen to your specific security requirements, work closely with you and your customers to advise you on the best approach.

By choosing Vista, you'll be working with a partner who stands by you and helps to resolve any challenges you experience.

VALUES & SERVICES

With over 30 years' experience in the Video Surveillance industry, we have made it our mission to understand your business. Everything Vista do is based around the values of listening, understanding, advising and supporting.

LISTENING

Vista don't just provide products. Before we offer any security solution, we listen to your specific requirements.

UNDERSTANDING

By choosing Vista, you'll be working with a partner that will stand by you every step of the way and help to resolve any issues by taking ownership of the solution. You'll benefit from our pre-configuration services, a 3 Year Advance Replacement as standard, Technical Support, along with Customer Services and Product Management teams to ensure that your project is a success.

ADVISING

Vista can advise you on the best approach tailored to your project - whether you're looking to make the most of your current analogue infrastructure or benefit from the advantages of IP video, or something else. We offer a differentiated product range reflecting the brand's depth of market understanding.

SUPPORTING

By choosing Vista, you'll be working with a partner who stands by you and helps to resolve any challenges you encounter. Vista will support you to ensure your suggested solution is suitable through technology days or demos at one of our two UK Demonstration Centres.

Overview

At Vista we focus on providing great quality products in a number of technology areas and, with the support of other industry leading brands, we can offer a complete tailored solution. The below diagram shows our core technologies, which are outlined throughout this brochure. The top section of the diagram highlights the fundamental parts of a solution, with Optio and VOLO offering other innovative technologies to meet specific project requirements.

Our Business Development Managers are here to support you and help prove the suitability of the proposed solution to your End Users via on-site demonstrations or with a trip to one of our Demonstration Centres.

Not sure what to do?

THERE'S NEVER BEEN A BETTER TIME TO TALK TO VISTA

With so many products and choices available, navigating the security market can be a real challenge. Vista has years of experience developing solutions to match the needs of installers and end-users alike.

If you want to find a cost-effective and scalable solution to address your security needs, why not talk to us now?

LET'S TALK:

tel: +44 (0) 118 912 5000

email: info@vista-cctv.com

web: vista-cctv.com

The Vista Project Life Cycle

Providing an excellent customer experience is more than just delivering good products. We understand that providing support and advice at the right time is critical to your business. There are lots of ways we can help you throughout all phases of a project lifecycle, so why not talk to us?

Opportunity

Dedicated Business Development

Our Business Development Managers are here to listen, advise and support you during the opportunity identification phase of the project. By working closely with you during joint meetings we listen to your End Users and help propose various solutions to reassure them that their operational requirements will be met.

Demonstration Centres

We realise that when it comes to initially proposing video surveillance equipment to your customers, the hardest part is establishing the solution's actual performance. In many cases it needs more than just a datasheet. That's why we have invested in our Demonstration Centres, so we can help you win more opportunities through joint demonstrations and product trials.

Design

Comprehensive Offering

Whether you are on a coaxial infrastructure looking to move to High Definition Analogue, managing a hybrid system, or wanting to upgrade to an IP infrastructure.

Value Through Re-Engineering

By really listening to and understanding your needs, we can advise on different technology solutions. We can create value and save you money through reconfiguring the system or using alternative technologies from Vista. This can be supported by a proof of concept so your End Users can see how the system will operate.

Procurement

Supplier Rationalisation

With an ever increasing number of products available it can be challenging and costly to find the right partner to support your business. Our comprehensive offering, supported by strategic relationships, can help you rationalise the number of suppliers you work with, saving you time and money.

Customised Project Pricing

Managing your costs over the lifespan of a project can sometimes be difficult. We understand the importance of avoiding any unforeseen costs so we collaborate with you to provide tailored project pricing, as well as ensuring our solutions are available as and when you need them.

Delivery

Inventory

We have made significant investments in our inventory to ensure we have the required solutions available to you. By working closely with you through the delivery phase we can better understand your installation schedules and mitigate any delays, ensuring your project roll out goes as smoothly as possible.

Bespoke Configuration Services

Our pre-configuration services can be tailored to your specific needs, helping minimise time on site and reducing risk as equipment is fully tested prior to delivery. We will unpack all the equipment, configure the video surveillance system, and re-pack it before shipping to site. Talk to us about your next project to discuss how we can help you.

Support

Advance Replacement

We understand the challenges you face once the system has been installed and this is why we offer a 3 Year Advance Replacement on Vista products and a 2 year Advance Replacement on Optio by Vista products. Our simple advance replacement process means we can help you manage any issues that do occur, minimising the impact for your End Users, and saving you time and money.

Strategic Partnerships

We work closely with selected technology partners and, if you experience any issue post installation, we will stand by you every step of the way. We'll take ownership of the solution by working with our partners to provide you with a resolution as quickly as possible.

Dedicated Tech Support

We provide you with dedicated technical support – both pre and post-sales. By choosing Vista, you'll be working with a partner who stands by you and helps to resolve any challenges you encounter.

Voice of Customer

Our 'Voice of Customer' (VoC) initiative supports our values of listening to and understanding our customers' requirements.

In a very crowded supplier landscape we see many manufacturers continually focusing on products, rather than really understanding your needs. The better we understand your challenges, the more effectively we can find ways to support your business and to make your engagement with us even more valuable.

The Voice of Customer web page allows you to get in touch directly with a member of the Vista team. This gives us the opportunity to provide answers to your queries, taking valuable feedback on board so we can improve our services, products and your experience with us.

Let's talk! We're here to listen.

Visit vista-cctv.com/about-vista-cctv/voice-of-customer

Vista Priority Partners

The Vista Priority Partners (VPP) Programme is available for a limited number of our key customers. These installers work closely with Vista to support and promote the brand and provide valuable feedback on what products are needed in the marketplace. In return, our VPPs receive exclusive support, training, and content ahead of the rest of the market.

Situated in Berkshire and Greater Manchester, our Demonstration Centres contain the latest IP and analogue products from our differentiated ranges. The Centres showcase the flexibility and scalability of our solutions, and are ideal for End User demonstrations and product shoot-outs. They can also be used for training and generally keeping up to date with the latest technology developments.

You can come along for full training on any of our products or for a quick refresher on something specific that you would like our support with.

Vista 3 Year Advance Replacement

3 YEAR
ADVANCE
REPLACEMENT
for Vista*
products

To help save you time and money on site we offer a 3 Year Advance Replacement on all Vista products.

How can you benefit from our 3 Year Advance Replacement?

- End user peace of mind – never be left without a working product on site
- Only one site visit – take out the faulty product and install the advance replacement product
- No time consuming or complicated returns procedures
- No waiting for products to be repaired – saves you time and money

Optio 2 Year Advance Replacement

2 YEAR
ADVANCE
REPLACEMENT*
Optio
by vista

To help save you time and money on site we offer a 2 Year Advance Replacement on all Optio by Vista products.

How can you benefit from our 2 Year Advance Replacement?

- End user peace of mind – never be left without a working product on site
- Only one site visit – take out the faulty product and install the advance replacement product
- No time consuming or complicated returns procedures
- No waiting for products to be repaired – saves you time and money

The process for managing Advance Replacement is as follows:

If any Vista or Optio by Vista product purchased from 4th January 2016 develops a fault within 36 months of invoice, an Advance Replacement will be offered[#], subject to confirmation of the fault by Vista Technical Support. Product warranty comes into effect from shipment date as determined by the serial number and purchase order number.

- 1 Fault confirmed by Vista Technical Support – Tel: 0118 912 5125
- 2 Once fault is confirmed, Norbain Customer Services will arrange Advance Replacement
- 3 Advance Replacement will be dispatched
- 4 Faulty unit returned to Norbain

[#] After 1 month from shipment date, we reserve the right to use a refurbished or service product for the remainder of the warranty period.

* This offer is subject to proper installation and use in accordance with our terms and conditions.

PRE-CONFIGURATION

Our pre-configuration service reduces the amount of time engineers spend on site by preparing the system prior to delivery. We will unpack all the equipment, configure the video surveillance system and re-pack it before shipping to site which reduces the risk to the installer.

The purpose-built configuration centre is capable of delivering a variety of services such as:

- Programming of IP addresses into cameras and servers to make all devices present on the network
- Installation of software onto servers
- Configuration of software/NVR to communicate with cameras
- Setting up camera streams for resolution and frame rate in accordance with client requirements
- Configuration of software/NVR to record streams
- Delivery of camera and equipment schematics detailing IP address and MAC address

These configuration services are designed to be flexible and can be tailored to respond to your specific needs.

CUSTOMER SERVICES

In the event of a product failure our simplified Advance Replacement process, supported by the Customer Services team, means we can resolve the situation as quickly as possible, saving you time and money.

PRE- & POST-SALES TECHNICAL SUPPORT

Our Technical Support team is available to assist and support on every Vista product, providing you with the reassurance of expert technical backup.

- Available from 8:30am-6:00pm, Monday to Friday
- Expert advice across the whole of the Vista product offering
- Advice on specification, configuration and implementation
- Technical Support Number: 0118 912 5125

BUSINESS DEVELOPMENT TEAM

We know that choosing the right video surveillance solution can be a challenge. Our dedicated Business Development team will help you identify the right solution for you and prove its suitability to your End Users through on-site demonstrations, or via our Demonstration Centres.

PRODUCT MANAGEMENT

With a wealth of experience in the CCTV industry, our Product Management team manage all aspects of the product life cycle. We continually assess market and technology trends, and strive to develop innovative products, using the most powerful and stable technologies that add real value to you.

VISTA WEBSITE

Our website is home to a wealth of detailed information on our products, support services, publications and latest news. Take a look at the website, vista-cctv.com, then give us a call. Let's talk!

YOUTUBE CHANNEL

Pictures speak a thousand words and our YouTube channel lets our videos do the talking for us. You can find useful videos that highlight our philosophy, particular technologies, new products and integrated solutions.

VISUAL CONTENT

Vista has created a wealth of visual content to support you in installing, using and promoting our solutions. On our website you'll find webinars explaining different solutions in the Vista range, along with animations showing where our Public Viewing Monitors can add value and cut costs. There are short Vista Bytes 'How To' videos, walking you through different features within our products as well as general Vista and Optio Video Surveillance visual explanations.

Analogue Cameras

Analogue System Schematic	16
HDA Cameras Overview	16
Optio Analogue Cameras Overview	16
HDA Static Cameras	18
HDA PTZ Cameras	21
Optio Analogue Cameras	22

Analogue System Schematic

The below schematic shows a typical coax based video surveillance system using a DVR and keyboard to control both PTZ and static cameras. In addition, the schematic takes into account the use of a router for external access to and from the internet or mobile applications to view live and archived images.

[SEE PAGE 18](#)

HDA Cameras Overview

Vista's range of HDA cameras provide flexibility by offering multi-format (TVI, AHD and CVBS) outputs, allowing them to be used with any standard definition legacy DVR and Viper HDA DVRs. The range includes PTZs, fixed domes, bullets and box cameras. The motorised autofocus function on some models makes for easier setup and ensures crystal clear images are always produced.

[SEE PAGE 22](#)

Optio Analogue Cameras Overview

Optio by Vista is a range of Video Surveillance security products designed with simplicity at its heart. From choosing the best products for an application, to installation, right through to operation by the end-user, Optio's simple approach takes the complexity out of surveillance systems. Optio analogue CCTV cameras come in bullet, eyeball, and vandal dome options with a selection of varifocal and fixed lens options.

Don't forget...

If you need help identifying the right solution for you, our Business Development team is here to help.

vista-cctv.com

Range Overview

HDA static cameras offer increased resolution over standard analogue and 960H coax-based CCTV systems. With 1080p resolution as standard, along with a variety of form factors, it allows them to cover the majority of applications.

Highlights of Range

- **Motorised Lens:** Allows the engineer to set the lens up from the DVR, making installation and adjustment easier and quicker
- **STARVIS™ Technology:** Sony's latest 1/3" back illuminated CMOS technology delivers exceptional quality colour images in low light scenes, where typically only black and white images would have been achievable. This is coupled with 120dB of true WDR to provide balanced images in challenging light conditions
- **EasyFit Technology:** Simply fit to ceiling or soffit and adjust the pan, tilt and lens' field of view "over the coax" from the DVR, making installation, or any necessary changes, quicker and easier

KEY RANGE FEATURES

- > FULL 1080P IMAGING IN TVI & AHD
- > TRIPLE FORMAT (TVI/AHD/CVBS)
- > COAX TELEMETRY IN TVI FOR OSD SET UP AND MOTORISED LENS CONTROL
- > TRUE DAY/NIGHT OPERATION
- > CAN OUTPUT CVBS FOR LEGACY DVR SUPPORT

Range Overview

The VP-HDA PTZ high performance domes offer a 20:1 or 30:1 optical zoom in 1080p, plus a further x16 digital zoom. All VP-HDA PTZ domes come with Sony STARVIS™ technology and 120dB of WDR for challenging light conditions. All three models include “quick-fit” design to make installation easier and provide strain relief on the flying lead.

Highlights of Range

- STARVIS™ Technology: Using Sony's latest 1/3" back illuminated CMOS technology to deliver exceptional quality colour images in low light scenes, where typically only black and white images would have been achievable
- 300m synchronised IR: The synchronised IR LED tracks with the camera zoom to provide optimum illumination up to 300m in the area you are viewing
- Quick-fit design: There is no need to open the dome during installation, therefore avoiding the chance of condensation. This reduces installation time and ensures effective operation

KEY RANGE FEATURES

- > FULL 1080P IMAGING IN TVI & AHD
- > SONY STARVIS™ TECHNOLOGY FOR EXCELLENT LOW LIGHT IMAGES

Range Overview

Optio analogue cameras come in bullet, eyeball and vandal dome options with a choice of varifocal or fixed lens.

Cleverly developed with just the most popular models and features, Optio offers a carefully selected range of surveillance camera options ideal for the majority of applications across the small commercial and residential market.

Highlights of Range

- Bullet cameras provide the perfect commercial solution – they offer a visible deterrent and have extended IR capability for quality images in low light conditions
- The vandal dome camera is a popular choice for retail and offices as they are vandal resistant with a small, discreet footprint
- Eyeball or Turret cameras have a low aesthetic profile, are extremely versatile and provide great low light performance, making them a good choice for large residential applications
- Choose the lens type to suit your needs – fixed or varifocal

KEY RANGE FEATURES

- > SIMPLE SET UP
- > COST EFFECTIVE (HIGH RESOLUTION IMAGES AT A LOW PRICE)
- > 4MP TRUE DAY/NIGHT SENSOR
- > IP67 – OUTSIDE INSTALLATIONS
- > INTEGRATED IR ILLUMINATION, EXCELLENT LOW LIGHT PERFORMANCE
- > QUAD VIDEO FORMAT: CVI/TVI/AHD/CVBS

SEE PAGE 28

Viper HDA DVRs Overview

The Viper HDA DVRs provide increased camera choice by offering multi format recording (TVI, AHD and CVBS), creating a simple upgrade path for existing analogue systems. They can also be used for installation on new HD systems, taking advantage of increased resolution without requiring the knowledge base of IP CCTV.

VMC

SEE PAGE 29

Viper VMC Overview

Pull together the Viper HDA DVRs and Viper IP NVRs into a single seamless system with one uniform and intuitive front end by using the Viper Virtual Matrix Controller (VMC).

REMOTE

Viper Remote Overview

Viper Remote is a fully featured mobile app that can connect to any Viper recording device, providing you with remote access whilst you are on the move. It offers push notifications to alert the end user of triggered alarms, allowing them to take immediate action. It also features live and recorded viewing of footage across a range of connected recorders, as well as camera control.

SEE PAGE 30

Optio DVRs Overview

Optio by Vista digital video recorders are ideally suited to work alongside the Optio analogue camera range. Optio offers a series of 4, 8 and 16-channel analogue Video Surveillance recorders offering efficient compression and smart fan technology for energy and noise reduction.

Viper Remote App

This app allows the user to remotely connect to Viper recorders using either an iOS or Android device.

Features include:

- PTZ control
- View live and recorded images
- Event push
- P2P connection

Range Overview

The Viper HDA is a true hybrid 4, 8 or 16 channel DVR, able to record TVI, AHD and CVBS cameras in 1080p realtime, along with IP cameras up to 5MP.

With two form factors, the 1U is the entry level unit with intuitive mouse control. The 2U L models provide loopthrough and DVD, plus mouse and VKBD4 keyboard support, giving operators a more familiar operation of PTZ cameras.

Highlights of Range

- True Hybrid: Gives flexibility of camera choice by accepting various types of camera inputs - TVI, AHD, CVBS and IP
- Loopthrough: Allows video to be taken to other locations
- VKBD4 support: Provides control of the Viper HDA and any connected PTZ cameras for familiar CCTV operation

KEY RANGE FEATURES

- TRUE HYBRID - TVI/AHD/CVBS/IP
- 1080P REALTIME RECORDING
- 5MP IP CAMERA SUPPORT
- 960H RECORDING FOR LEGACY CAMERA SUPPORT
- COAX AND RS-485 TELEMETRY
- ARCHIVE VIA USB OR OVER THE NETWORK
- SPOT MONITOR OUTPUT

Overview

The Virtual Matrix controller is an innovative product, providing a PC-free solution for the control of systems using both Analogue and IP cameras.

The VMC connects to the Viper range of IP NVRs and Hybrid DVRs. As a result the system operator can view and select from up to 64 cameras on the main 4K UHD output, while still watching and controlling the cameras on the HDMI Sub monitor output.

The operator also has the ability to "WARP" to any of the remotely connected devices. This gives them full control of all the features of that particular remote device including system set up, PTZ control and advanced Smart and Event search capabilities.

KEY RANGE FEATURES

- > VIRTUAL MATRIX CONTROL OF VIPER DVRs AND NVRs
- > 64 WAY UHD 4K MONITOR SUPPORT - MAIN MONITOR
- > SUB MONITOR CONTROL OF PTZ ON MULTI-SCREENS - SPLITS UP TO 32 CAMERAS
- > WARP CONNECTION FOR DIRECT CONTROL AND SET UP OF NVRs AND DVRs
- > MIRROR RECORDING OF UP TO 64 CAMERAS, WITH MP4 DOWNLOAD
- > 2U HIGH RACK MOUNTABLE, UP TO 32TB INTERNAL STORAGE

Cutting-edge
CCTV made simple

It's time to **leave those complex CCTV setups behind!**

Optio by Vista is a new CCTV brand designed with simplicity at its heart. From choosing the best products for an application, to installation, right through to operation by the end user, Optio's simple approach takes the complexity out of surveillance. Cleverly developed with just the most popular models and features, Optio offers a carefully selected range of surveillance and recording options ideal for most applications across commercial and residential markets.

Hybrid System Schematic

Depending on your current installation we can offer various options for creating the most suitable hybrid system.

A) Improve Analogue image quality

B) Combine IP and Analogue recording solutions

Don't forget...

Our flexible pre-configuration service reduces the amount of time engineers have to spend on site.

[SEE PAGE 12](#)

Overview

IP video surveillance offers the advantages of High Definition (HD) images and the flexibility of multiple Client viewing stations. Existing analogue systems and infrastructure can be amalgamated with an IP system to easily form a hybrid solution. Depending on your current installation we can offer various options for creating the most suitable hybrid system.

These include:

- A) Upgrade your legacy analogue systems to HD with the flexibility of 25% of the recording channels being available for IP cameras by using the Viper HDA
- B) Pull together the Viper HDA DVRs and Viper IP NVRs into a single seamless system with one uniform and intuitive front end by using the Viper Virtual Matrix Controller (VMC)

SEE PAGE 40

VK2 Cameras Overview

The VK2 camera range offers the installer the opportunity to provide increased resolution up to 5MP in multiple form factors to suit virtually any situation. These include vandal resistant domes, 360° fisheye and PTZ cameras. Varying levels of functionality can be offered to suit particular scenarios, such as True Wide Dynamic Range for areas where you have challenging light conditions.

HDA

SEE PAGE 28

Viper HDA DVRs Overview

The Viper HDA DVRs provide increased camera choice by offering multi format recording (TVI, AHD and CVBS), creating a simple upgrade path for existing analogue systems. They can also be used for installation on new HD systems, taking advantage of increased resolution without requiring the knowledge base of IP CCTV.

IP

SEE PAGE 54

Viper IP NVRs Overview

The Viper NVRs are available in 4 to 32 channel options, with various sizes of internal storage to suit most situations. The PoE and plug and play functionality make them simple to install and commission saving you valuable time on site. The unique "WARP" feature allows a Master unit to display the cameras from multiple Viper units networked together, giving you flexibility of design while removing the cost of a Client PC.

VMC

SEE PAGE 29

Viper VMC Overview

Pull together the Viper HDA DVRs and Viper IP NVRs into a single seamless system with one uniform and intuitive front end by using the Viper Virtual Matrix Controller (VMC).

REMOTE

SEE PAGE 27

Viper Remote Overview

Viper Remote is a fully featured mobile app that can connect to any Viper recording device, providing you with remote access whilst you are on the move. It offers push notifications to alert the end user of triggered alarms, allowing them to take immediate action. It also features live and recorded viewing of footage across a range of connected recorders, as well as camera control.

Range Overview

The VK2L-2MP series is our entry level IP camera range. However, entry level doesn't mean low featured. With H.265 encoding, 25ips at 1080p, digital WDR, triple streaming as standard and Hi-Stream regions of interest, the VK2L-2MP cameras punch well above their weight.

Highlights of Range

- H.265 encoding: Greatly reduces both the bandwidth and storage requirements compared to H.264
- Compact form factors: The turret and bullet designs are discrete and unobtrusive
- Hi-Stream (ROI): Applies Static or Dynamic regions of interest to the image. The camera continuously analyses the scene and applies more compression to areas of low interest with no motion, and less compression to areas of high interest and motion to provide high resolution images, thus lowering both the bandwidth over the network and storage on the HDD

KEY RANGE FEATURES

- > 2MP: 1080P (16:9) RESOLUTION
- > TRIPLE STREAMING
- > 25IPS AT 1080P
- > FIXED LENS
- > DWDR, BLC, PRIVACY ZONES AND MOTION DETECTION

MOUNTING OPTIONS

There are mounting options available for Vista's VK2 Static Cameras

VK2

SEE PAGE 78

Range Overview

The VK2-2MPX and VK2-4MPX series are all H.265 cameras in multiple form factors. The entire range offers 25ips at maximum resolution, true WDR of 120dB, quad streaming and intelligent Video Content Analysis as standard. The hardest decision you'll have to make, is do you want 2MP or 4MP images?

Highlights of Range

- True WDR: 120dB WDR provides more balanced images in challenging light conditions, particularly in scenes of high contrast. For example, areas of bright light and dark shadow
- Motorised Lens: Allows the engineer to easily set the lens up from the camera webpage or the NVR, reducing the installation time and making sure the cameras see exactly what is required
- Hi-Stream (ROI): Applies Static or Dynamic regions of interest to the image, with the camera continuously analysing the scene to apply more compression to areas of low interest with no motion, and less compression to areas of high interest and motion to provide high resolution images, thus lowering both the bandwidth over the network and storage on the HDD

Range Overview

The 3MP cameras provide a careful balance between price and performance, combined with high quality video to offer solutions for internal or external applications.

Highlights of Range

- **Motorised Lens:** Allows the engineer to set the lens up from the camera webpage or NVR making set up and adjustment easier and quicker
- **EasyFit Technology:** Simply fit to ceiling or soffit and adjust the pan, tilt and lens' field of view remotely, making installation, or any required changes, quicker and easier
- **STARVIS™ Technology:** Uses Sony's latest 1/3" back illuminated CMOS technology to deliver exceptional quality colour images in low light scenes, where typically only black and white images would have been achievable

Range Overview

At Vista we know that not all system requirements are the same and sometimes more than a standard camera is required. For this we have specialist cameras to help you provide a suitable solution.

Fisheye Cameras

We offer either 5MP internal or 12MP External Fisheye camera options. The 12MP also includes IR illumination and is IK10 vandal resistant rated. Both cameras use Sony STARVIS™ technology ensuring that images are clear, even in low light applications. Full dewarping of the image is possible via Viper IP, Viper Central and other compatible VMS.

Highlights

- 5MP resolution: Greater detail
- 1.05mm lens: Give a full 360° x 182° image (extreme wide angle)
- STARVIS™ Low Light Technology: Produces very clear images in low light applications

Number Plate Camera

The VK2-1080XNPR10Z has been designed specifically to catch images of vehicle number plates. Its 10x auto focussing zoom lens can be remotely adjusted to give the ideal field of view for each individual application.

The camera uses a combination of a fast shutter speed, IR pass filtering and LED IR illumination to create a controlled scene environment. This allows the cameras to deliver a crisp image of the number plate both day and night and overcomes the common problem of the bright light from the vehicles headlights obscuring the plate.

Highlights

- 1080p resolution: Excellent detailed licence plate images
- 3-15m range: The 10:1 zoom lens has 12 presets from 3-15m in 1m increments. This helps to reduce set up time, ensure that the field of view is correct for the distance and ensures optimum reading settings
- ONVIF Profile S: Use with the VANPC IP number plate recognition system, or by using Viper, simply record video footage of vehicles. It is also ONVIF S compliant so can be used on many 3rd party IP recording systems
- STARVIS™ Low Light Technology: Produces very clear images in low light applications

SEE PAGE 78

Range Overview

The VK2-HDX PTZ cameras offer 1080p, H.265 format and utilise Sony STARVIS™ technology for excellent images in low light conditions. With 20:1 or 23:1 zoom, this allows the camera to get the detail required for the application. For areas without ambient light the VK2-HDX23IR-SM camera provides up to 60m illumination. The sealed design on both models reduces the chance of condensation when fitting and include “quick-fit” design to reduce both installation time and provide strain relief on the flying lead.

Highlights of Range

- STARVIS™ Technology: Using Sony's latest 1/3" back illuminated CMOS technology to deliver exceptional quality colour images in low light scenes, where typically only black and white images would have been achievable
- 60m IR: 4 high powered IR LEDs provide up to 60m illumination, with Smart IR technology for optimum images in low or zero light
- Quick-fit surface mount design: There is no need to open the dome during installation therefore avoiding the chance of condensation. This reduces installation time and ensures effective operation

KEY RANGE FEATURES

- > 1080P RESOLUTION
- > 20:1 OR 23:1 LENS

SEE PAGE 79

Range Overview

The VK2-4K cameras offer an impressive range of high end features. As well as the UHD resolution, which guarantees incredibly detailed images, the cameras feature TWDR, alarm and audio inputs, SD card local recording and high end video analytic features. The housings are aesthetically designed but are also robustly built and are IK10 certified.

Highlights of Range

- 4K resolution - Ensure incredibly detailed recorded images
- Advanced Video Content analytics - Allows the cameras to analyse the scene and detect incidents, such as people entering defined areas, or crossing a line in the wrong direction
- Hi-Stream function - Regions of Interest within the scene can be set to have less compression and higher record rates compared with other areas that are given higher compression lower frame rates, so allow savings in bandwidth and storage requirements
- IR illumination, both cameras utilise IR illumination, on the PTZ dome. This tracks the zoom lens so allowing an up to 300m IR range

SEE PAGE 78/79

Range Overview

Optio IP cameras come in bullet, eyeball and vandal dome options with the choice of varifocal or fixed lens.

Cleverly developed with just the most popular models and features, Optio offers a carefully selected range of surveillance camera options ideal for the majority of applications across the small commercial and residential market.

Highlights of Range

- Bullet cameras provide the perfect commercial solution – they offer a visible deterrent and have extended IR capability for quality images in low light conditions
- The vandal dome camera is a popular choice for retail and offices as they are vandal resistant with a small, discreet footprint
- Eyeball or Turret cameras have a low aesthetic profile, are extremely versatile and provide great low light performance, making them a good choice for large residential
- Choose the lens type to suit your needs – fixed or varifocal

KEY RANGE FEATURES

- HIGH RESOLUTION IMAGES
- POWER OVER ETHERNET
- 4MP TRUE DAY/NIGHT SENSOR
- IP67 – OUTSIDE INSTALLATIONS
- INTEGRATED IR ILLUMINATION, EXCELLENT LOW LIGHT PERFORMANCE
- VARIFOCAL (ZOOM) LENS OR FIXED (WIDE ANGLE) LENS
- UP TO 100M CAT5E CABLE RUNS

VISTA VIPER RANGE

The Vista Viper range allows you to simply pull together Viper HDA DVRs and Viper IP NVRs, into a single, seamless system.

The Viper Virtual Matrix Controller (VMC) gives you complete control of the system through the uniform and intuitive central management software.

[SEE PAGE 54](#)

Viper IP NVRs Overview

The Viper NVRs are available in 4 to 32 channel options, with various sizes of internal storage to suit most situations. The PoE and plug and play functionality make them simple to install and commission saving you valuable time on site. The unique "WARP" feature allows a Master unit to display the cameras from multiple Viper units networked together, giving you flexibility of design while removing the cost of a Client PC.

[SEE PAGE 29](#)

Viper VMC Overview

Pull together the Viper HDA DVRs and Viper IP NVRs into a single seamless system with one uniform and intuitive front end by using the Viper Virtual Matrix Controller (VMC).

[SEE PAGE 27](#)

Viper Remote Overview

Viper Remote is a fully featured mobile app that can connect to any Viper recording device, providing you with remote access whilst you are on the move. It offers push notifications to alert the end user of triggered alarms, allowing them to take immediate action. It also features live and recorded viewing of footage across a range of connected recorders, as well as camera control.

Optio IP NVRs Overview

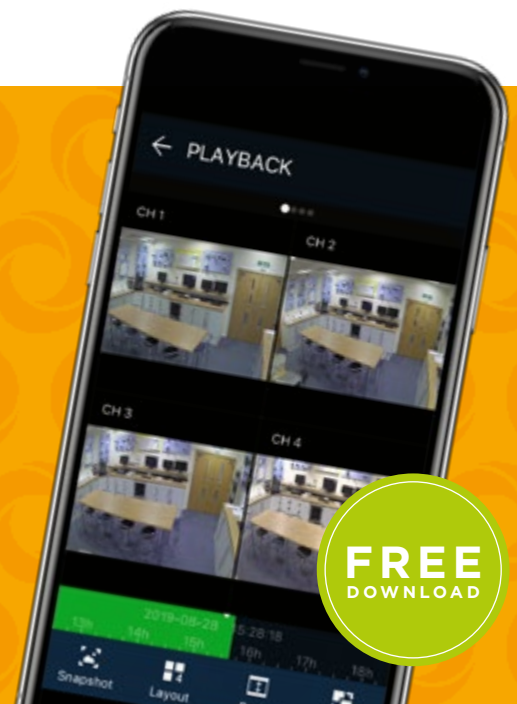

Optio by Vista network video recorders are ideally suited to work alongside the Optio IP camera range. Optio offer a series of 4, 8 and 16-channel IP CCTV recorders offering efficient compression and smart fan technology for energy and noise reduction.

Viper Remote App

This app allows the user to remotely connect to Viper recorders using either an iOS or Android device.

Features include:

- PTZ control
- View live and recorded images
- Event push
- P2P connection

Range Overview

The Viper H5S is a 4K UHD realtime H.265 NVR with 4, 8 or 16 channels of recording. With direct monitor connection and easy to use mouse driven menu, set up is kept simple and a Client PC is not required. With PoE ports on the rear, VK2 cameras are auto configured on connection and other cameras can be added via ONVIF Profile S.

Highlights of Range

- Standalone NVR: Installation time and cost can be reduced as a Client PC is not required for set up. Just use the intuitive GUI to set the camera up as you require
- EPOS integration: VSI-PRO retail till interface allows data from the till to be displayed and recorded on the video stream and as metadata, making it possible for smart searches on specific text (e.g. "No Sale")
- Keyboard support for PTZ: Using the ViperKBD provides familiar, simple and responsive control of PTZ domes

KEY RANGE FEATURES

Range Overview

The Viper H5 is capable of dual encoding both the next generation H.265 and H.264 cameras. With 32 channel recording, its functionality is like its H.264 sibling with the added benefit of a 4K realtime recording. With direct monitor connection and an easy to use mouse driven menu, set up is kept simple and a Client PC is not required. With PoE ports on the rear VK2 cameras are auto configured on connection. Other cameras can be added via ONVIF Profile S.

Highlights of Range

- Standalone NVR: Installation time and cost can be reduced as a Client PC is not required for set up. Just use the intuitive GUI to set the camera up as you require
- EPOS integration: VSI-PRO retail till interface allows data from the till to be displayed and recorded on the video stream and as metadata, making it possible for smart searches on specific text (e.g. "No Sale")
- Keyboard support for PTZ: Using the ViperKBD or VKBD4 provides a familiar, simple and responsive control of PTZ domes

Range Overview

The powerful VIPER H5-49R NVR is aimed at hi-end large systems. This NVR is capable of recording 49 x 4K cameras in real-time H.265. This combined with the inclusion of hardware raid makes it ideal for more advanced systems.

The NVR is housed in a 2U high server type rack mount chassis, allowing them to be installed in standard 19" rack mount cabinets. The chassis is designed to hold up to 8 swappable hard drives, making it possible to have up to 80Tb of on-board storage.

The NVR has 2 HDMI connections, the main output supports 4K resolution, while the secondary output supports Full HD. If more monitor outputs are required for larger systems, then using Vista innovative PoE powered Monitors with in-built decoders makes it possible to display cameras at any point on the network.

Highlights of Range

- 49 channels of 4K resolution allows the installer greater flexibility in systems design
- Hardware Raid (0,1,5 and 10), allows the Viper to conform to more rigorous tender specifications
- 8 Hard drive bays, gives a massive 8-TB of on-board storage
- The ability to directly control Vista's innovative PoE decoder monitors allows the systems to be designed with multiple local or remote monitors.

KEY RANGE FEATURES

Overview

Vista's high powered 4, 8 and 16 port PoE switches are ideal for distributed architecture systems or smaller IP-based systems.

Our PoE switches offer the installer an effective solution for creating simple but powerful network designs. These compact switches allow connection to either 4, 8 or 16 local cameras, via the PoE ports. Each switch has dual up-link ports, one of which can be used to connect to a local server NVR, leaving the other up-link port for connection to the main network and Client PCs.

The PoE switches can run in 2 modes. In normal mode they operate as a standard network switch with communications between each of the PoE ports allowing the standard 90m transmission distance. With the flick of a switch CCTV mode is engaged turning off communication between the PoE ports but allowing communication between each individual port and the 2 up-link ports. This greatly extends the PoE transmission distance up to 250m.

The 4 port switch can deliver up to 60W, ideal for 4 static cameras, or 2 higher consumption PTZ domes. The 8 port switch can deliver up to 120W and 8 static or 4 PTZ cameras, and the 16 port switch up to 250W, and offers 16 static or 8 PTZ cameras.

KEY RANGE FEATURES

- > CCTV MODE FOR 250M DISTANCE
- > DUAL UP-LINK PORTS
- > POE
- > SUPPORTS POE+

Highlights of range

- CCTV Mode: With a flick of a switch CCTV mode can be enabled extending your PoE distance up to 250m

PVM Overview

The Vista PVM range provides businesses with an effective way of discouraging unwanted behaviour whilst helping create a safe and welcoming environment.

The range is ideal for a wide variety of applications including protecting high risk areas in retail environments, preventing tailgating and buddy punching, ensuring health & safety requirements are adhered to and creating an enhanced customer experience.

Highlights of Range

- Reduces shrinkage
- Protects profits
- Discourages unwanted behaviour
- Encourages desired behaviour
- Creates a secure, trusted environment
- Allows for simultaneous CCTV and advertising functionality
- Enhances customer experiences
- Additional revenue opportunity through supplier adverts or videos
- Display as a full screen or split screen view on decoder models

How the PVM Camera Models Work

Using motion detection, the in-built camera is activated when an individual approaches the monitor. The resulting high-definition image shows live footage of the individual and their actions in the immediate environment.

Applications

PVM Decoder Overview

Innovatively constructed to complement existing monitors with in-built cameras, the PVM-DECODER displays up to 16 cameras with the added benefit of showcasing promotions and informative messages.

This decoder can also be displayed in full screen or a multi-screen segment to suit your needs and can produce images for cameras anywhere on a network to be displayed in remote locations. The monitor and camera can be powered by PoE, making it a very quick and cost-effective method of installing a single CAT5e cable.

Suitable for remote monitoring stations and video walls, the PVM-DECODER can also showcase promotional advertisements, informative messages or can even be programmed to have information pop up when triggered by an event.

KEY RANGE FEATURES

- > 18"/27"/32" 16:9 SCREEN
- > 1080P

VESA mount	100 x 100	100 x 100, 200 x 100	100 x 100, 200 x 100
Net Weight	5.33Kg	10.3Kg	15.3Kg

How the PVM Decoder Options Work

The decoder options can display images from up to 16 cameras or video files. They are ideal for displaying advertising information or informative media content at the same time as offering CCTV security functionality. Video files can be displayed as a full screen or as a segment within a split screen view. Like the camera single screen models, the content can be shown permanently, activated by motion detection or by using video analytic triggers.

Decoder screen layout variations:

			
16 channel split screen display	Quad display: 3 live cameras and 1 advertising video segment	Picture in Picture (PiP): full screen advertising video with 1 small live camera segment	Full screen Advertising video

Don't forget...

If you need help identifying the right solution for you, our Business Development team is here to help.

HDA

Overview

The innovative VK2-4KXDECODER has been designed to fulfil requests made by multiple large retail organisations who want to be able to use their CCTV systems for product advertisement.

The decoder allows any camera (or multiple cameras) on a network to be displayed via an HDMI output, onto a monitor. These cameras can be up to 4K resolution.

The decoder also has the additional benefit of being able to display video files (such as advertising media) on the monitor or a segment of the screen when in split screen display.

Highlights of Range

- 4K resolution - Up to 4 UHD resolution cameras can be displayed in quad format
- 16 channel - Up to 16 x 1080p cameras can be simultaneously displayed in a 4 x 4 split
- Alarm or motion switching from split screen to full screen or PiP
- Display of advertising or information media, with alarm switching options
- Multiple control options - Set up from local mouse, Web page Viper Central or 64 channel Viper NVR

PRODUCT NAME	VK2-4KXDECODER
PRODUCT CODE	0499770
Display Output	HDMI, CVBS
Compression	H.264, H.265
Display Resolution	HDMI: 3840x2160, 1920x1080 CVBS: NTSC, PAL
Display Speed	125/150ips (PAL/NTSC)
Display Mode	HDMI: 1/4/14 (4K res max 4 chn) CVBS: 1
Media file display	AVI format (converted using supplied software)
Ethernet	1 RJ45 10/100/1000 Base-T
Max. Network Throughput	600Mbps
Remote Monitoring	CMS, VM
Audio Out	1 RCA, 1 HDMI
Alarm Out	1 Output (Terminal block)
USB	USB 3.0 x 1 / USB 2.0 x 1
SD CARD	Micro SD
Operating Humidity	0 ~ 90% RH (Non-condensing)
Operating Temperature	0°C ~ +45°C
Power Supply	12VDC, 2A
Power Consumption	Max. 10W
Dimension(WxHxD)	155 x 100 x 40mm
Net Weight	0.45Kg

KEY RANGE FEATURES

- > UHD 4K RESOLUTION
- > 16 CHANNEL DISPLAY OF 1080P CAMERAS
- > MEDIA FILE DISPLAY
- > ALARM SWITCHING BETWEEN VIDEO AND MEDIA FILES
- > SIMPLE CONTROL AND SET UP

SEE PAGE 11

Overview

The innovative VIPER-HDAENC16 encoder takes the concept of a multi-channel Analogue to IP encoder a step further.

The encoder is based on the design of the very popular VIPERHDA Analogue recording range. This allows the encoder to be used to view all cameras on the network and control them separately, while converting Analogue CCTV images to IP streams.

Unlike other multi-channel encoders the VIPERHDAENC16 does not require a PC or laptop for configuration. It can be set up locally via its local mouse and monitor output, using a menu structure identical to the rest of the VIPER family of products. This greatly simplifies the need for engineer training and reduces installation time and complexity.

KEY RANGE FEATURES

- > 16 CHANNEL ANALOGUE TO IP ENCODING
- > TVI/AHD AND CVBS FORMATS
- > SIMPLE LOCAL SET UP
- > LOCAL MONITOR OUTPUT
- > PTZ CONTROL
- > ONVIF OUTPUT

Highlights of Range

- 16 channel Analogue to IP encoder - can convert 16 Analogue camera signals to 16 individual video streams
- TVI/AHD and CVBS formats - The encoder can convert standard CVBS resolution cameras or full HD TVI and AHD Analogue cameras
- Simple set up - Unlike other multi channel encoders the VIPER-HDAENC16 can be fully configured using its local monitor output and mouse, as well as via its web page

PRODUCT NAME		A VIPER-HDAENC16
PRODUCT CODE		0495260
Video Input Channel		Up to 16ch (16 BNC, 4 IP configurable)
Video Input Type		AHD, TVI, CVBS, IP
Video Input Resolution		1080p, 720p, 960H, D1(CVBS)
Local Display Output		1 VGA, 1 HDMI, 1 BNC (Spot, CVBS)
Local Display Resolution	VGA, HDMI	1920x1080, 1280x720, 1024x768
	Spot	1.0 Vp-p (750hm, Composite)
Local Display Speed		Up to 400/480ips
Display Mode	VGA, HDMI	1920x1080, 1280x720, 1024x768
	Spot	1.0 Vp-p (75 ohm, Composite)
Compression		H.264
Encoding Frame Rate		Main stream: 200/240ips@1080p (PAL/NTSC) Sub stream: 200/240ips@VGA (PAL/NTSC)
Protocols		TCP/IP, UDP, IPv4/v6, HTTP, HTTPS, FTP, UPnP, RTP, RTSP, RTCP, DHCP, ARP, Zeroconf
Ethernet		1 RJ45 10/100/1000 Base-T
Max. Network Throughput		288Mbps, Support Bandwidth Control
API Support		API, ONVIF Profile S Compliance
Audio		4 RCA Input / 1 RCA Output, 1 HDMI Output
Alarm		4 Input / 1 Output (Terminal block)
Serial Port		2 USB, 1 RS485 (Terminal block)
PTZ & OSD Control		RS485, UTC (Coaxial Control for TVI and AHD)
Operating Humidity		0 ~ 90% RH (Non-condensing)
Operating Temperature		0°C ~ +45°C
Power Supply		12VDC, 2A
Power Consumption		Max. 14.4W
Dimension(WxHxD)		375 x 44.9 x 318.2mm
Net Weight		Approx. 1.8 Kg

Don't forget...

Our flexible pre-configuration service reduces the amount of time engineers have to spend on site.

SEE PAGE 12

Range Overview

Our VFS monitor range produces high resolution, high contrast images via the exceptionally efficient backlit LED panel. This produces a cost saving of approximately 40%, at 240VAC, over current fluorescent backlit LCD monitors. Input types include HDMI, looping BNC connectors, S-Video and PC and audio connections, with the WHDA models accepting TVI, AHD and CVBS technology.

The hard glass front gives the screen extra protection when used in industrial environments. An intuitive multilingual menu system makes the monitors very simple to set-up. Front panel key locks stop unwanted adjustment of monitor settings, while the combination of a VESA mount and desk stand allows the monitors to be mounted anywhere.

KEY RANGE FEATURES

- > 4:3 OR 16:9 MODELS
- > 1080P ON WHDA MODELS
- > TVI, AHD AND CVBS SUPPORTED ON WHDA MODELS
- > DESK STAND INCLUDED
- > VESA100 MOUNT

DID YOU KNOW

Diamond Overview

DIAMONDe is the CCTV engineer's ultimate test tool. Packed with functions developed to make the job of installing, commissioning and fault finding of CCTV systems easier, this ergonomically designed touch screen monitor is a must have for any installation engineer.

As a basic test monitor, DIAMONDe will accept virtually any CCTV camera format including IP, CVBS, TVI, AHD and CVI video. Both RS485 and UTC protocols for TVI, AHD & CVI PTZ cameras can be tested directly from the unit.

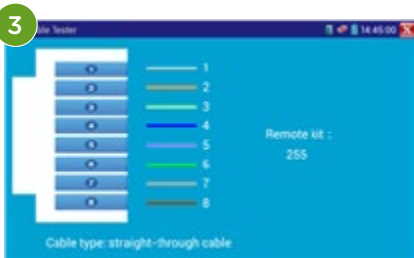

KEY RANGE FEATURES

- > IN-BUILT VK2-REMOTE IP CAMERA APP
- > ONVIF CAMERA TESTER
- > IP ADDRESS DISCOVERY TOOL
- > MANUFACTURER-SPECIFIC CAMERA VIEWERS
- > RTSP VIEWER
- > SCREEN SNAPSHOT
- > VIDEO RECORDER
- > WI-FI CONNECTION
- > COLOUR BAR GENERATOR
- > DIGITAL MULTIMETER
- > CAT5E CABLE TESTER
- > CABLE TRACER
- > IP SWITCH PORT FLASHER
- > PING TESTER
- > RS45 DATA MONITOR
- > VIDEO & AUDIO PLAYERS
- > LED FLASH LIGHT
- > 12VDC OUTPUT
- > POE OUTPUT
- > 5VDC USB OUTPUT
- > HDMI OUTPUT/INPUT

PRODUCT NAME	A DIAMONDe	HUMV
PRODUCT CODE	0317240	0472580
Description	Multi-function IP/CVBS/TVI/AHD/CVI test monitor	Ground loop isolation transformer (analogue)

Diamond functions:

- 1) ONVIF Device Manager live viewing of camera image
- 2) ONVIF Device Manager showing camera parameter settings
- 3) Cable tester pages showing RJ45 connections
- 4) Digital Multimeter - function selection screen

Overview

Our 12VDC and 24VAC PSUs are available as 1, 4 and 8 output units. All plastic cased PSUs include individually fused outputs, with LED indicators for quick fault finding.

Suitable for integration into any CCTV system, externally rated plastic casing options are lightweight and easy to handle. They come with 22mm cable gland entry points and, for convenience, are supplied with spare fuses.

They are all tested to EN50130-4 (Alarm systems, Electromagnetic compatibility, Product family standard: Immunity requirements for components of fire, intruder and social alarm systems).

RG59 Overview

Coax cables developed specifically for the CCTV market ensure that the correct quality of copper cabling is being used in installations. All Vista RG59 cables are graded in accordance with the European CPR Directive. We offer three variants in different lengths:

CCS: Copper Coated Steel

SCC: Solid Copper Core

SG: Shotgun (A CCS RG59 and pair of copper cores for power)

CAT5e & CAT6 Overview

Essential to any IP networking infrastructure, our CAT5e and CAT6, 4 pair UTP cable comprises high quality, solid copper cores to ensure that industry standard network cable lengths can be achieved before additional repeaters or switches are required. Available in lengths of 305m and 500m, the cable is constructed with either a PVC or LSZH (Low Smoke, Zero Halogen) for internal use or Duct grade (PE) sheath for external applications. All Vista CAT5e and CAT6 cables are graded in accordance with the European CPR Directive.

KEY FEATURES

- > CAT5E & CAT6 OPTIONS
- > REDUCED CROSS TALK
- > UV RESISTANT
- > LOW SMOKE, ZERO HALOGEN

Camera Housings Overview

Our housings have been designed to ensure easy installation. Each housing has a fully cable-managed bracket to eliminate any loose and unsightly cabling. The housings are an ideal size to fit the majority of CCTV cameras with either a fixed or varifocal lens. The IP66 rated weatherproof housing not only looks smart, but also reduces any vandal-related threats.

VOLO Access Control

VOLO Access Control Schematic	82
VOLO Access Control Overview	83
VOLO Benefits & Applications	84
VOLO Performance	86

Schematic

VOLO Master Access Control Units (ACUs) can each control up to two doors and have integrated GSM/GPRS capability. Sites can be expanded with additional VOLO slave units to control up to 50 doors per site and up to 10,000 sites combined.

Overview

VOLO is an innovative way of delivering Access Control solutions. By combining Cloud Hosting and GSM/GPRS connectivity you benefit from a powerful and flexible system that allows you to deliver a truly proactive solution.

As well as reducing installation times and hardware costs, you'll benefit from greater flexibility, more scalability and better service delivery for your customers.

Hosted software is ideal for those projects that require central configuration and management of multiple customers, sites, doors and users. Sites can be managed and administered from any smart device or PC from anywhere in the world.

Benefits Of Cloud Hosted Solutions

Reduced Hardware Investment

No need for a dedicated PC station on site or dedicated network.

Scalability

Allows simple and virtually unlimited scalability to offer a solution from 1 door to 10,000 sites with up to 100,000 users.

Connectivity

VOLO can be configured on either a LAN or via GSM/GPRS to offer you the greatest flexibility.

All SIMs are roaming SIMs to ensure that you have the best available connection at all times.

System Maintenance

The hosting software is automatically updated to ensure the latest features and benefits are operational.

Thanks to system notification messaging you will always know the status of your systems. This means you can deliver a truly proactive service 24 hours a day, 365 days a year.

Applications

FACILITIES MANAGEMENT

VOLO supports multiple access rights for users and system administrators simultaneously from internet connected browser enabled and supported devices.

VOLO's multi-user interface allows remote, local, off-site, and third-party management of the access control rights.

With integrated reporting and audit trails of access and configuration changes, VOLO is ideal for FM companies and other value add service providers to include comprehensive outsourced management of clients' access control systems as part of the service provision.

- Small footprint of hardware minimises impact on retail space
- Protect cash/staff rooms as well ingress to facility
- Over 10,000 sites – ideal for multiple outlets
- Remote access from any internet browser allows permanent and temporary staff management
- No local PC installation or maintenance required

RETAIL

With sales space and management time premium for most retailers, VOLO's requirement for minimal local hardware makes it ideal for smaller premises requiring centrally managed staff access.

With no local PC server required, not only is there less clutter but removing direct, local access to the server negates a number of potential security concerns. The 2 reader controllers can secure up to 2 doors, perfect for cash offices and store rooms whilst the addition of slave units can expand the system as required for individual store requirements.

Hosted software allows convenient system maintenance from local, regional or central offices to update staff records, access rights, and manage card issuance for up to 100,000 users, therefore reducing administration and training.

- No IT LAN/WAN network required – VOLO uses GSM mobile network
- Resilient to power and communications disruption with battery backup facility
- Small footprint controller for minimum space impact
- No local PC installation or maintenance required

System Management

System programming, adding and deleting users and changing access rights/times can all be done via the web browser from anywhere in the world.

System Reporting

VOLO has a powerful automated reporting tool for facilities such as time and attendance, system misuse and historical usage patterns etc.

Licence Based Hosting

Fixed, transparent licence fees allow you to plan a clear and effective cost plan with no hidden costs to the end users.

System Resilience

VOLO cloud hosting is provided by Amazon Web Services, which ensures that the system is fully backed up, offers full business continuity plans and guarantees that all data is secure.

Open Protocol Controllers

VOLO controllers are based on an open platform to allow integration with the majority of access control readers. This means that VOLO can also be applied to system upgrades as existing readers and existing credentials can be retained.

UTILITIES & REMOTE SITES

From water treatment to transmission towers and solar farms, not all facilities have the existing network infrastructure to accommodate a multi-site networked access control system.

VOLO's built-in GSM/GPRS modem eliminates the need for both a local PC server and a computer network, reducing hardware and infrastructure investment.

Site managers, engineers, contractors, and third-party access rights can be managed individually from any suitable location.

- No IT LAN/WAN network required – VOLO uses GSM mobile network
- Resilient to power and communications disruption with battery backup facility
- Small footprint controller for minimum space impact
- No local PC installation or maintenance required

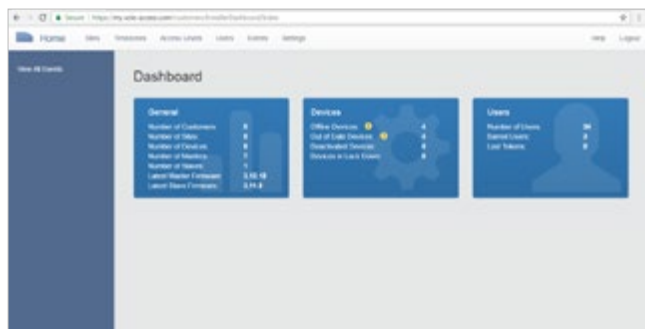

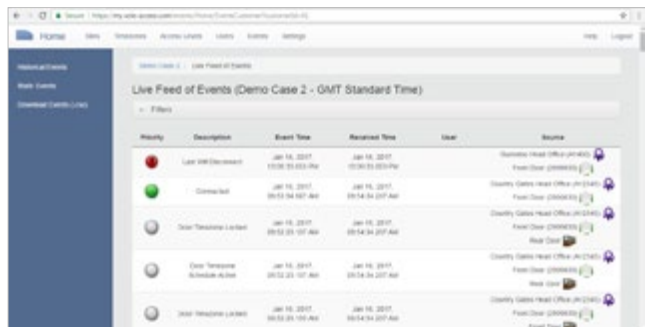

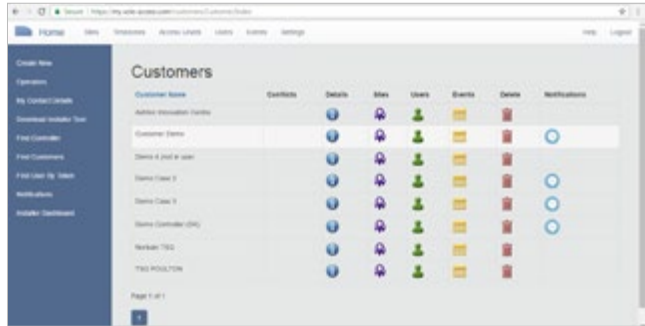

CONSTRUCTION & TEMPORARY SITES

VOLO's GPRS connectivity makes it ideal for construction sites, festivals, void property, and other temporary sites where there is no reliable or existing network.

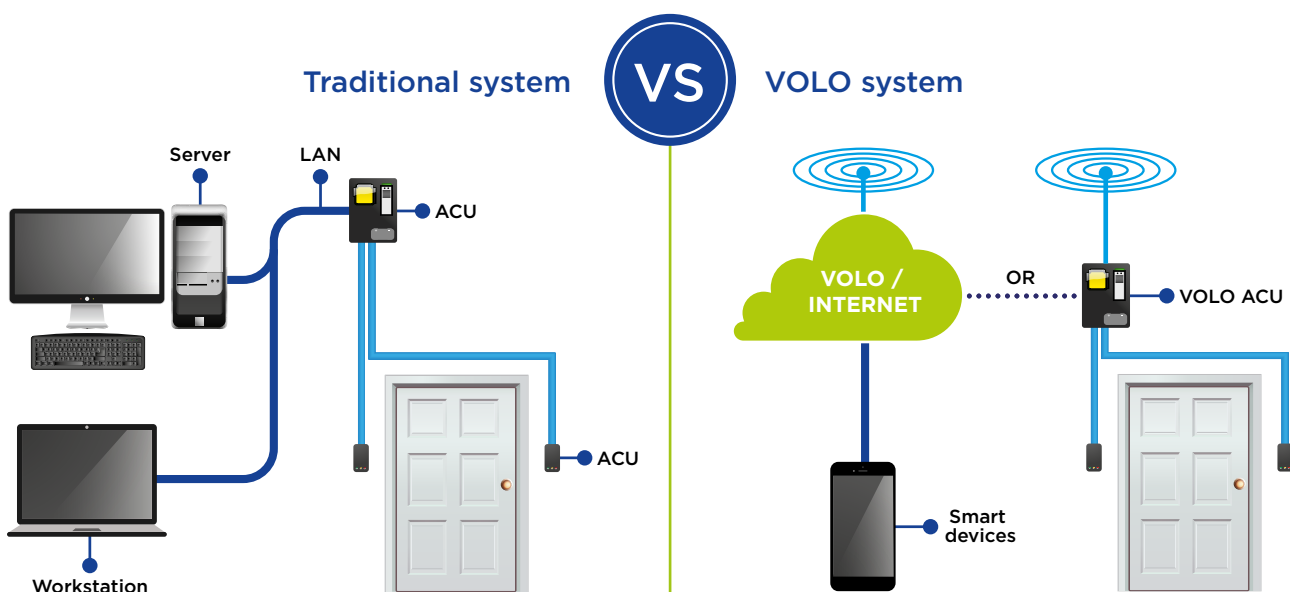

The VOLO ACU has provision for a battery within the housing, allowing operation with reduced or intermittent power supply. Sites can be managed and users and ACUs re-assigned for new project deployment.

- No communication infrastructure required
- Quick and easy to deploy
- Re-deployable
- Resilient to power and communications disruption
- Multiple user group access for different contractors
- No local PC installation or maintenance required

- ✓ **POWERFUL SCALABILITY**
From 1 door to over 10,000 sites and 100,000 users.
- ✓ **NO LOCAL PC REQUIRED**
Save space and reduce maintenance risk & hardware investment.
- ✓ **MOBILE GPRS CONNECTIVITY**
For those sites where no convenient LAN or internet connection are available.*
- ✓ **MULTI-ACCESS LEVELS**
256 access levels allow integrator and end-user multi-user access rights for site and system programming privileges.
- ✓ **ACCESS FROM ANYWHERE**
Via supported browser devices, including smart phones and netbooks.
- ✓ **LICENCE BASED HOSTING**
Scales with the number of sites, increasing only as the system requirement grows.**
- ✓ **POWERFUL REPORTING**
Including options to export to Excel & scheduled timed reports.
- ✓ **INTEGRATION**
Via our open API VOLO can be fully integrated into other operating platforms and solutions such as CCTV, payroll, CRM, Visitor management and much more.

Compatible Browsers

* GSM/GPRS network availability and VOLO airtime agreement required.

** Annual licence per Master ACU required, each able to control up to 24 slave units with up to 50 readers.

POWER AND FLEXIBILITY THE ULTIMATE COMBINATION

VOLO GSM/GPRS & IP ENABLED HOSTED ACCESS CONTROL

- ✓ **POWERFUL SCALABILITY** | From 1 door to over 10,000 sites and 100,000 users.
- ✓ **ACCESS FROM ANYWHERE** | Via supported browser devices, including smart phones and tablets.
- ✓ **OPEN PROTOCOL FOR READERS & CREDENTIALS** | Readers can be either Weigand or Clock and Data.
- ✓ **POWERFUL REPORTING** | Including scheduled timed reports, easily exportable to Excel.

49 Channel rack mount server chassis
Up to 4K recording resolution at real time
8 Hard drive bays - up to 80TB
RAID recording - 0, 1, 5 and 10

Accessories

VKBD4	0363570	Joystick KBD for Viper H5
VIPER-1U-RM	0567480	Rackmount kit for Viper 1U
VIPER-RM	0813380	Rackmount kit for Viper 2U

Cable

Coax - CCS Copper Coated Steel

		
RG59/CCS/100	0480010	100m, LSF, black
RG59/CCS/200	0480020	200m, LSF, black
RG59/CCS/500	0480030	500m, LSF, black

Coax - SCC Solid Copper Core

RG59/SCC/100	0480060	100m, LSF, black
RG59/SCC/200	0480070	200m, LSF, black
RG59/SCC/500	0480080	500m, LSF, black

Shotgun - (CCS RG59 and a pair of copper cores for power)

		
RG59/SG5/100	0480090	100m, LSF, black, 2x 0.5mm ²
RG59/SG5/200	0480100	200m, LSF, black, 2x 0.5mm ²
RG59/SG75/100	0480110	100m, LSF, black, 2x 0.75mm ²
RG59/SG75/200	0480120	200m, LSF, black, 2x 0.75mm ²

BNC

		
VBNC	0442930	Single BNC
VBNC100	0442940	Pack of 100 BNC

CAT5/6

		
CAT5E/UTP/305/PVC/GREY	0480540	305m, PVC, grey
CAT5E/UTP/305/LSZH/VIOLET	0480560	305m, LSZH, violet
CAT5E/UTP/305/LSZH/WHITE	0480570	305m, LSZH, white
CAT5E/UTP/305/DUCT/BLACK	0480580	305m, DUCT, black
CAT5E/UTP/500/DUCT/BLACK	0480590	500m, DUCT, black
CAT6/UTP/305/PVC/GREY	0480610	305m, PVC, grey
CAT6/UTP/305/LSZH/VIOLET	0480620	305m, LSZH, violet
CAT6/UTP/305/DUCT/BLACK	0480630	305m, DUCT, black

Miscellaneous

2.1MM JACK	0498900	DC jack adaptor
DIAMONDE	0317240	Test monitor TVI/AHD/CVI/IP/HDMI
HDMI LEAD	0473430	1.75m
HDMI/CVBS	0695130	HDMI - CVBS Converter
HUMV	0472580	Ground loop isolation TX (analogue)
VKBD1	0446190	RS485 joystick controller
QBOX	0473150	Lockable box
VSD/16	0349850	16 output RS485 star driver

Power Supplies

12VDC PSU - Encapsulated

		
VPSU12-500e	0785190	1 x 500mA, 2.1mm plug
VPSU12-1000e	0785200	1 x 1000mA, 2.1mm plug
VPSU-2000e	0785210	1 x 2000mA, 2.1mm plug
VPSU12UNIVe	0785260	1 x 5000mA, 2.1mm plug

12VDC PSU - Cased

		
VPSU1221EXTe	0785220	1 x 2000mA, IP66
VPSU1241EXTe	0785230	1 x 4000mA, IP66
VPSU1244EXTe	0785240	4 x 1000mA, IP66
VPSU1248EXTe	0785250	8 x 500mA, IP66

24VAC PSU - Encapsulated

		
VPSU24VAC-750e	0785150	1 x 750mA
VPSU24VAC-1500e	0785160	1 x 1500mA
VPSU24VAC-2000e	0785170	1 x 2000mA
VPSU24VAC-3000e	0785180	1 x 3000mA

24VAC PSU - Cased

		
VPSU2444EXTe	0785110	4 x 1000mA, IP66
VPSU2488INTe	0785140	8 x 1000mA, internal
VPSU2431EXTe	0785090	1 x 3000mA, IP66
VPSU2441EXTe	0785100	1 x 4000mA, IP66
VPSU2461EXTe	0785120	1 x 6000mA, IP66

Lenses (for box cameras)

		
VDD28V1214PU	0346450	1/3" CS 2.8-12mm 10cm lead
VDD5V5014PU	0315830	1/3" CS 5-50mm 10cm lead
VDD27V1314IRP-3MP	0631660	1/2.7" CS 2.7-13mm IR 20cm lead
VDD5V5016IRP-2MP	0631670	1/3" CS 5-50mm IR 20cm lead

Housings (for box cameras)

		
VHE-23LV	0356970	24VAC, MCL, 90x85x260mm
VHE-23HV	0356960	24VAC, MCL, 90x85x260mm

HDMI Monitors

 16.9 wide		
VFS118WHDA	0338110	18" 1080p, HDMI/VGA/BNC (TVI/AHD/CVBS)
VFS121WHDA	0773530	21" 1080p, HDMI/VGA/BNC (TVI/AHD/CVBS)
VFS124WHDA	0773540	24" 1080p, HDMI/VGA/BNC (TVI/AHD/CVBS)

IP Monitors

VK2 PVM CAMERA RANGE

			
VK2-PVM10CAM	0406550	10"	Monitor with built-in Full HD 1080p camera, PoE/PoE+
VK2-PVM27CAM	0407030	27"	
VK2-PVM32CAM	0496450	32"	

VK2 PVM DECODER RANGE

			
VK2-PVM18DEC	0496570	18.5"	Monitor with built-in 4K Decoder, display of live camera images or video Media files, PoE+
VK2-PVM27DEC	0496580	27"	
VK2-PVM32DEC	0496590	32"	

Client PCs

		
VISTAPC-I5-CL-CLIENTPC	0475360	i5, 8GB RAM, Dual mon o/p
VISTAPC-I7-CL-CLIENTPC	0475400	i7, 16GB RAM, Quad mon o/p
VISTAPC-KBDM	0657290	PC keyboard & mouse

IP PoE Switches

		
QSW4	0766120	4 port PoE
QSW8	0766130	8 port PoE
QSW16	0486900	16 port PoE
QSW24	0486910	24 port PoE

Analogue/IP - Encoders & Decoders

		
VK2-HDA-ENC1	0812070	Single channel CVBS/TVI/AHD video to IP encoder. PTZ control - Coaxial (TVI, AHD), RS485 (Vista, Pelco P/D), 12VDC
		
VIPER-HDAENC16	0495260	16 channel CVBS/TVI/AHD video to IP encoder. PTZ control - Coaxial (TVI, AHD), RS485 (Vista, Pelco P/D). Monitor o/p & built-in GUI, 12VDC
		
VK2-4KXDECODER	0499770	4K Decoder, display of live camera images or video media files, 12VDC

DVR KEY FEATURES
4K HDMI display (simultaneous VGA @ 1080p)
P2P – easy APP setup (iOS & Android)
Smart fan technology – energy / noise reduction
H.265 smart codec – efficient compression
Quad video format – CVI/TVI/AHD/CVBS
HDD Storage – Up to 10TB (1 x HDD bay)

NVR KEY FEATURES
4K HDMI display (simultaneous VGA @ 1080p)
Up to 8 Megapixel recording resolution
P2P – easy APP setup (iOS & Android)
H.265 smart codec – efficient compression
PoE per channel
HDD Storage – Up to 10TB (1 x HDD bay) on 4 & 8 channel & up to 20TB (2 x HDD bay) on 16 channel

*Other hard drive storage sizes are available upon request.

HDD Storage Chart*

IMAGES PER SECOND (IPS)	CHANNELS	D1	1080P	4MP
25ips	1	140GB	500GB	Max 20ips @4MP
	4	550GB	2TB	
	8	1.1TB	4TB	
	16	2.2TB	8TB
